Inspired by
FUTURE MOBILITY

Today's Mobility industry is dramatically changing, triggered by the accelerated rise of new technologies towards Connected, Electrified, Personalized, Shared, Digital and Autonomous. As the role of software and data grows, so does its complexity, thus BlueBinaries is uniquely positioned to drive value at the intersection of vehicle engineering, enterprise and ecosystem towards future transformation.

30+
OEMs & Suppliers
as esteemed customers

8+
Complete vehicle
E/E architecture
programs delivered

9+
End to End Systems
(HW/SW) developed
across vehicle domains

10+
Test and Validation
Programs at System
and Vehicle level

**Vehicle Engineering
& Systems Development**

**Digital Engineering
& Enterprise IT**

**Testing &
Homologation**

BLUEBINARIES

Trusted Mobility Partner across Business Areas

Vehicle Engineering & Systems Development

E/E Architecture Design

Systems Engineering

Hardware and Software Development

Diagnostics

Functional Safety & CyberSecurity

Test & Validation

Homologation & Certification Support

Digital Engineering & Enterprise IT

Digital Enablement for "Software Defined Vehicle"

Connected Digital Products

Enterprise Apps and IT Transformation

Smart & Connected Manufacturing Solutions

Digital R&D

Testing & Homologation

Test Solutions

Tests Preparation

Test Operations [Lab, Track & Fleet]

Regulatory & Performance

Homologation & Certification Support

Engineering Services | Solution Accelerators | Technology Platforms

Electrification

Cockpit, Connected & User Experience

Lighting Systems

Safety & Autonomous Driving systems
